

CORRIGENDUM

Nakamae H., Fujii K., Nanno S., Okamura H., Nakane T., Koh H., Nakashima Y., Nakamae M., Hirose A., Teshima T., Hino M. (2019) A prospective observational study of immune reconstitution following transplantation with post-transplant reduced-dose cyclophosphamide from HLA-haploidentical donors. *Transpl Int*, 32: 1322–1332. <https://doi.org/10.1111/tri.13494>.

In the original version of the abovementioned article, “The conditioning regimen for PT/Cy-haplo consisted of fludarabine (150 mg/m²) and high-dose cytarabine (8 g/m²)/melphalan (100 mg/m²).” was described.

Since its publication, it has been noticed that the dose of fludarabine was incorrect and we would like to correct the dose of fludarabine.

The correct dose of fludarabine should be “180 mg/m²”.

The authors wish to apologize for this error.
